

Alzheimer's disease and the **NDIS**

A guide for participants, families and carers working out what the NDIS funds for Alzheimer's disease, and how to ask for it.

FOR PARTICIPANTS & FAMILIES

PUBLISHED SEPTEMBER 2026

About this guide

This guide is for people living with Alzheimer's disease, and for the families and carers around them. It is written by Independent Life Disability Supports (InLife), a registered NDIS provider working with families across Victoria.

We wrote it because the NDIS is complicated, and the people who need it most usually have the least time to work it out. We have kept it plain. Where the NDIS uses jargon, we explain it. Where Alzheimer's disease has its own vocabulary, we explain that too.

WHO THIS IS FOR

Three groups of readers

People recently diagnosed with Alzheimer's disease, or told they may qualify for the NDIS. Families and carers supporting someone living with it. Health professionals helping a person prepare an application.

WHAT YOU WILL FIND

Six sections, and the last is yours

What Alzheimer's disease is, and how it affects daily life. How the NDIS works and how to apply. The supports it commonly funds. How InLife works as a provider. Who to call. Pages to fill in and bring to your planning meeting.

A NOTE ON LANGUAGE

This guide is written in English. InLife supports families in Farsi, Urdu, Hindi, Punjabi and English, and this guide is published in eleven languages. Ask, and we will work in the language that suits your household. Interpreters are free at every NDIS meeting, and you never have to ask a family member to interpret their own health conversation.

What is in here

1	About Alzheimer's Disease	04
	What Alzheimer's disease is, how it affects daily life, and where the NDIS fits in	
2	The NDIS basics	08
	The access test, applying, the planning meeting, and managing the money	
3	Your supports	15
	Allied health, equipment and the support workers who make the week work	
4	Why InLife	19
	How we roster, how we match workers to households, and what we commit to	
5	Resources & next steps	22
	Who to call, how plan reviews work, your rights, and the words the NDIS uses	
6	Your workbook	27
	Your details, a map of your week, and space for your goals	

THE WORKBOOK IS YOURS

The last four pages are a workbook: your details, a map of your week, and space for your goals. Fill them in and bring this guide to your planning meeting. A planner who can see your week does not have to imagine it.

SECTION ONE

About Alzheimer's Disease

What Alzheimer's disease is, how it affects daily life, and where the NDIS fits in.

What is Alzheimer's?

Alzheimer's disease is the most common form of dementia – a group of conditions that affect the brain over time. In Alzheimer's, changes to brain proteins (amyloid plaques and tau tangles) gradually affect the cells that handle memory, language, decision-making and spatial awareness. The pace and pattern vary from person to person.

The NDIS is for participants under 65 at first access. Most participants with dementia in the scheme are people diagnosed with younger-onset dementia – before 65 – and their plans focus on staying at home, staying connected to family, staying in the rhythms of life that matter, and easing the load on the people who love them. Where a person was already an NDIS participant before turning 65, their plan continues. For people aged 65 and over at diagnosis, the funding pathway is My Aged Care rather than the NDIS.

Common signs and symptoms

- Changes to short-term memory – forgetting recent conversations or appointments.
- Word-finding difficulty in conversation.
- Getting lost in familiar places.
- Difficulty with familiar tasks – paying a bill, following a recipe.
- Changes to mood or motivation.
- Difficulty with judgement or decision-making.
- Changes to sleep – sometimes increased daytime sleeping, night wakefulness.

The medical context

- Diagnosis is made by a geriatrician, neurologist, or memory clinic – based on history, cognitive testing, brain imaging, and sometimes biomarker testing.
- Younger-onset dementia (diagnosed before 65) is genetically and clinically distinct from late-onset Alzheimer's and is the cohort the NDIS funds.
- Medications (cholinesterase inhibitors, memantine, and newer disease-modifying treatments) can slow decline for some people – best discussed with a treating.
- Multidisciplinary memory clinics – neurology, neuropsychology, OT, social work – are the gold standard for diagnosis and ongoing care.
- Non-pharmacological supports (music, reminiscence, exercise, social participation) have strong evidence and are core to NDIS plans.
- Most people with dementia live at home for many years after diagnosis with the right combination of family, supports, and environment.

ALZHEIMER'S IS NOT

Dementia is not the same as 'losing yourself'. The person remains the person – their history, their preferences, their humour, the people they love. What changes is how they communicate and what they need help with. Dementia is not the same as general ageing. It is not 'just being forgetful'.

WHERE TO LEARN MORE

Dementia Australia's resource library is the best Australian starting point – they have specific information for younger-onset dementia. The National Dementia Helpline is staffed by dementia consultants. Dementia Support Australia provides clinical advice when behaviour changes are part of the picture.

How Alzheimer's Disease can affect daily life

Everyone's experience of Alzheimer's is different. The list below covers areas the NDIS commonly funds support around – it is not a prediction. The conversation with your treating team and the NDIA Planner is what shapes your supports.

MEMORY AND ORIENTATION

How you remember

Short-term memory changes first; long-term memory often stays vivid. Routines, familiar environments, and orientation aids reduce the daily friction – the OT's most important work is making the home easier to live in.

DAILY LIVING

How you live each day

Familiar tasks may need scaffolding – a support worker alongside while the participant still does what they can. The aim is preserved capability, not done-for-you care.

FAMILY AND CARERS

How your family copes

Carers carry a heavy load. The NDIS funds respite – both regular short breaks and longer accommodation-based respite – and counselling. A sustainable carer is the strongest support a participant has.

COMMUNICATION

How you talk and listen

Word-finding becomes harder; understanding of tone, music and emotion often stays strong. Speech therapy helps families adapt how they communicate so connection stays open both ways.

MOOD AND WELLBEING

How you feel

Anxiety, low mood and frustration are common, especially in early stages. Psychology, music, exercise and connection with peers who understand – all part of supports that work.

CONNECTION AND MEANING

How you stay you

Music, faith, family routines, sensory experiences, the smell of a particular meal, a familiar song – these reach when words don't. The plan is built around the things that matter to this person, not a generic dementia template.

An ordinary life

A diagnosis of Alzheimer's is not a closed door. The NDIS exists to fund what each person needs to live an ordinary life – to work or study, to spend time with family, to

“Dementia changes how we remember. It does not change who we are, who loves us, or what brings us joy today.”

INDEPENDENT LIFE · HOW WE BEGIN EVERY PLAN

What an ordinary life can look like

- participate in their community, to enjoy the things they enjoy.
- What "ordinary life" looks like
- Living at home with your family
- Continuing favourite hobbies – gardening, music, cooking
- Family meals, family routines, family celebrations
- Faith community – gurdwara, mosque, church, temple
- Walking the dog, visiting the local park
- Listening to music that has always mattered to you
- Spending time with grandchildren
- Travel – domestic, with planning and the right support
- Volunteering and community involvement, with the right scaffolding
- Making your own decisions about how you live, for as long as possible

A photograph of a bedroom. On the left, there are dark, patterned curtains hanging in front of a window. The window is covered in condensation or rain, making the view outside blurry. To the right of the window, a bed is visible with a light-colored, textured duvet and two pillows. The room has a muted green wall. A small, dark-framed picture hangs on the wall to the left of the curtains. A large white number '2' is overlaid in the top right corner of the image.

2

SECTION TWO

The NDIS basics

What the scheme is, whether you can access it, and how to prepare for a planning meeting.

What is the NDIS?

The National Disability Insurance Scheme funds the supports a person needs because of disability. It is not income support and it is not health care.

THE WORD	WHAT IT ACTUALLY MEANS
National	It runs across the whole country, wherever you live.
Disability	It funds support for intellectual, physical, sensory, cognitive, neurological and psychosocial disability, where the functional impact is substantial and likely to be lifelong.
Insurance	It takes a lifetime view, investing earlier so that less support is needed later where that is possible.
Scheme	It funds what you need to build skills, stay independent and live an ordinary life.

Who runs it

The **NDIA** (National Disability Insurance Agency) makes funding decisions. The **NDIS Quality and Safeguards Commission** regulates providers, handles complaints and protects participant rights.

The NDIS in one sentence

It funds “reasonable and necessary” supports so you can live an ordinary life. What that means in practice is the conversation you will have at your planning meeting.

Can I access the NDIS?

The four basic rules

- You are under 65 when you apply.
- You are an Australian citizen, permanent resident, or hold a Protected Special Category Visa.
- You have a permanent disability that substantially affects how you do everyday activities.
- You need support in at least one of: communication, mobility, social interaction, learning, self-care, self-management.

How to apply

- Phone the NDIA on 1800 800 110 to request an Access Request Form.
- Your GP or treating team completes the evidence sections. They are usually the ones who can describe your functional impact.
- The NDIA aims to decide within 21 days of a complete form.

FOR ALZHEIMER'S DISEASE SPECIFICALLY

Younger-onset dementia (diagnosed before 65) is on the NDIS List A – meaning it automatically meets the disability requirements. Access is generally straightforward where the diagnosis is documented. The strongest applications include a neurologist or geriatrician letter (with the formal diagnosis), a recent neuropsychological assessment, and an FCA from an OT showing functional impact on daily living.

IF YOUR APPLICATION IS DECLINED

You can ask the NDIA for an **internal review** (a section 100 review) within three months of the decision. If you are still dissatisfied, you can apply to the **Administrative Review Tribunal** on 1800 228 333 or at art.gov.au. The ART took over this work from the AAT in October 2024, so older letters and websites may still use the old name. Many decisions are changed at the internal review stage once stronger evidence is supplied, so it is worth gathering evidence before you escalate.

Before the planning meeting

The planning meeting is where your first plan gets built with the NDIA. It runs about ninety minutes. Going in prepared changes what comes out.

ONE

Write your goals

Big and small. Where do you want to be in twelve months? In five years? Goals are written in everyday language, not medical terms.

TWO

Map your day

Use the workbook at the back of this guide. Note where help would change things, and be specific about the hard parts of the day.

THREE

Gather evidence

Functional Capacity Assessment, GP letters, hospital discharge summaries, allied health reports, current medication list.

FOUR

Bring someone

Family, an advocate or a support coordinator. You can ask for a free interpreter, and you should if English is not your first language.

EXAMPLE GOALS

Goals are written in everyday language, not medical terms. The NDIA accepts goals like "I want to be able to make my own breakfast" or "I want to volunteer at the local library."

At the planning meeting

The meeting is run by an NDIA planner or a Local Area Coordinator. Both can build your plan with you.

What they will ask

- Your personal details and how you would like to be contacted.
- Which community or mainstream supports you already use: GP, hospital, family, church, mosque, gurdwara, temple.
- Your safety at home and in the community.
- Your goals, for the next twelve months and beyond.
- The kind of support that would help you reach them.

What you can do

- Take your time. Pause, think, ask for the question again.
- Use pictures, photos or other communication aids.
- Have family or a support person speak on your behalf.
- Ask for an interpreter, at no cost to you.
- Decline to answer anything that feels invasive.

BRING THIS GUIDE

The workbook pages at the back are designed for this meeting. Filled in, they give the planner a coherent picture of who you are and what you need, without you having to hold it all in your head on the day.

“Reasonable and necessary” supports

Your plan is built from supports the NDIA considers reasonable and necessary. Reasonable means fair, taking into account what is already available to you. Necessary means you need it to live an ordinary life or work toward your goals.

A support must meet all six tests

- Related to your disability, not general living costs.
- Value for money, judged against the alternatives.
- Likely to be effective and beneficial, with evidence behind it.
- Takes into account informal supports: family, carers, community.
- Most appropriately funded by the NDIS, not by health, education or housing.
- Not a day-to-day living cost everyone has, such as rent, food or ordinary internet.

WHAT THIS LOOKS LIKE FOR ALZHEIMER'S DISEASE

For younger-onset dementia, supports that pass the test commonly include support workers who know the person and their routine, OT for home modifications and orientation aids, music therapy (strong evidence base), exercise physiology for general health and mood, communication aids as language changes, GPS and orientation technology where wandering is a risk, and substantial carer respite – both informal supports and short-term accommodation. Capacity-building therapies focus on what is preserved, not what is lost: maintaining sensory engagement, social connection, and the routines that bring meaning to a day.

Three ways to manage your funds

At the planning meeting you choose how your funding is paid out. You can change this at any time during the plan, and you can use a different method for different parts of your budget.

OPTION ONE

NDIA managed

The NDIA pays your providers directly. No paperwork for you, and no invoices to check. You can only use registered providers.

OPTION TWO

Plan managed

A plan manager processes invoices and tracks your budget. You can use both registered and unregistered providers. Plan management is funded by the NDIS on top of your other budgets, at no cost to you.

OPTION THREE

Self managed

You pay providers yourself and claim back from the NDIA. The most flexibility, including on price, and the most administration.

THIS IS YOUR CHOICE, NOT YOUR PROVIDER'S

Each option suits different households, and no provider should push you toward one. Ask your planner or Local Area Coordinator to talk you through the trade-offs, and change it later if it is not working. InLife works under all three.

3

SECTION THREE

Your supports

The therapies, equipment and support workers the NDIS commonly funds for Alzheimer's disease.

Allied health for Alzheimer's Disease

Allied health is the clinical layer of your supports – therapies and assessments delivered by registered professionals. For Alzheimer's, the disciplines most commonly funded are:

OCCUPATIONAL THERAPY

OT – home and daily life

Home environment assessment, orientation aids, fall prevention, simplifying the home for cognitive ease, sensory engagement strategies. The OT is usually the lead clinician across the journey.

SPEECH PATHOLOGY

Speech – communication and swallowing

Communication strategies as language changes, swallowing assessment, mealtime safety planning. Speech therapists work with families on how to keep conversation going.

PSYCHOLOGY

Psychologist – early-stage support

Adjustment counselling after diagnosis, advance care planning conversations, family therapy, mood support. Particularly important in the months following diagnosis.

MUSIC THERAPY

Music Therapy – connection and calm

Strong evidence base in dementia care. Music can reach when words cannot – familiar songs reduce anxiety, support memory cues, and create shared joy with family. Registered music therapists deliver structured sessions.

EXERCISE PHYSIOLOGY

EP – strength and wellbeing

Walking programmes, balance work, strength training. Physical activity supports mood, sleep, and slows functional change. Group programs offer social benefit.

SOCIAL WORK

Social Worker – family and systems

Carer support, family meetings, navigating systems (NDIS, Centrelink, advance care planning), guardianship and decision-making conversations.

A NOTE ON FUNDING CATEGORIES

Allied health is funded under Capacity Building, Improved Daily Living, and is given to you in hours. You can use any registered allied health provider you choose. Hourly rates are capped by the NDIS price limits, so a provider cannot charge you above the cap. InLife coordinates allied health; we do not deliver it, and we are not registered for therapeutic supports.

Equipment commonly funded

The NDIS funds disability-related equipment under Capital, as assistive technology. These are the items most often funded for Alzheimer's disease.

EQUIPMENT	WHAT IT IS FOR
Orientation clocks and calendars	Dementia-friendly clocks (showing day, date, time of day in plain language) reduce confusion and anxiety.
GPS tracking devices	Discreet wearable trackers for participants who walk independently and may become disoriented.
Smart-home automation	Automated lighting routines (helps with day/night orientation), medication reminders, automatic stove cut-off, motion sensors,
Communication aids	Memory books, communication boards, photo albums, simplified phones – keep family connection possible as language changes.
Sensory engagement tools	Tactile blankets, fidget items, music players pre-loaded with familiar songs. Evidence-based for reducing agitation.
Home modifications	Contrasting colours for orientation, bathroom safety rails, removal of trip hazards, simplified door signage.
Pressure mats and bed sensors	Alerts a carer when the participant moves at night, where night wandering is a safety concern.
Adapted cutlery and dinnerware	High-contrast plates, weighted cutlery – supports independence at mealtimes.

How a request works

- An occupational therapist or other clinician assesses the need and writes a report.
- The report, with quotes where required, goes to the NDIA.
- Low-cost items can come straight out of an existing budget. Higher-cost items need the assessment and approval first.

Home modifications

Minor home modifications cost up to \$20,000 and do not change the structure of the home. **Complex** modifications go beyond that, or affect the structure, and the NDIS funds a building construction practitioner to work alongside your home modification assessor. Neither is the same thing as Specialist Disability Accommodation, which is a separate funding stream for purpose-built housing.

Support workers, the everyday backbone

Support workers help with the daily tasks that disability makes harder: personal care, getting to appointments, cooking, medication prompting, community access, staying connected.

Most participants have a named team of three to five workers across the week. The right team feels like a small group of familiar people who know how you like things done, not a roster of strangers.

What good looks like

- The same workers week after week, not whoever is free that day.
- Workers who speak your home language at the door.
- Respect for your faith, dietary practice and household norms.
- Trained on your specific clinical needs before the first shift.

And what you should expect

- Backup workers you have met and approved in advance.
- Shift notes shared within 24 hours, in plain language.
- One escalation point when something is wrong.
- The right to change your team without having to explain why.

THE INLIFE MEET-AND-APPROVE PROMISE

No worker meets a participant for the first time on a shift. You meet them, you decide, then we roster. That holds across every plan we deliver.

4

SECTION FOUR

Why InLife

How we roster, how we match workers to households, and what we commit to.

How InLife is different

Plenty of providers fill shifts from a rotating casual pool drawn across several agencies. For someone living with Alzheimer's disease, that is the wrong shape. We roster deliberately instead: a named team around each household, and no worker on a shift the household has not already met and approved.

CONSISTENCY

The same workers

A named team who know your routine, your preferences and your clinical needs. No strangers on a Tuesday because somebody called in sick.

LANGUAGE

Your language at the door

Our team works in Farsi, Urdu, Hindi, Punjabi and English. Workers are matched to the language your household actually speaks, including the language you fall back on when you are tired or unwell.

ONE POINT OF CONTACT

No call trees

One phone number and one email, both reaching the managing directors. No agency switchboard, and no "someone will get back to you".

RECORDS

Written so you can read them

Every shift note and every report written in plain language, and a monthly summary of what has been used, copied to your support coordinator.

REGISTERED, AND VERIFIABLE

InLife is a registered NDIS provider, regulated by the NDIS Quality and Safeguards Commission, covering Core supports, Module 1 high-intensity daily personal activities and Module 2A behaviour support plan implementation. Every registration group is public on the Commission's provider register. We do not deliver therapeutic supports or Specialist Disability Accommodation, and we will tell you so rather than stretch to fit.

How we match workers to households

Matching is the part most providers skip. We treat it as the most important conversation we have with a new household.

ONE

Language

The languages spoken at home, including the one a person reaches for in moments of stress or confusion.

TWO

Gender

Cultural and personal preferences about who delivers personal care, taken as a requirement rather than a preference.

THREE

Cultural fit

Faith observance, dietary practice, household norms and family hierarchy.

FOUR

Clinical competency

The specific skills the person's support requires: medication, transfers, mealtime management, seizure response.

FIVE

Geography

Close enough that workers arrive on time and stay reliable over a long placement.

SIX

You decide

We shortlist, you meet them, you approve. Only then do we roster. If it is not working, say so and we change it.

5

SECTION FIVE

Resources & next steps

Where to turn, how plan reviews work, your rights, and the words the NDIS uses.

Where to turn

About the NDIS

ORGANISATION	HOW TO REACH THEM	WHAT THEY DO
NDIA	1800 800 110 · ndis.gov.au	Access decisions, plan reviews, general NDIS enquiries.
NDIS Commission	1800 035 544 · ndiscommission.gov.au	Complaints about providers and workers, conduct, restrictive practices.
Administrative Review Tribunal	1800 228 333 · art.gov.au	External review of NDIA decisions after an internal review. Took over from the AAT in October 2024.
Disability Advocacy Network	1300 365 085 · da.org.au	Independent advocacy when you feel unheard.
TIS National	131 450	Free interpreting, in more than 150 languages.

For Alzheimer's Disease specifically

ORGANISATION	HOW TO REACH THEM	WHAT THEY DO
Dementia Australia	1800 100 500 · dementia.org.au	National peak body. National Dementia Helpline, information library, education courses, advocacy.
Dementia Support Australia	1800 699 799 ·	24/7 free clinical support service for behavioural and psychological symptoms of dementia (BPSD).
Dementia Australia – Younger Onset.	1800 100 500 · dementia.org.au	Information and post-diagnostic support for people diagnosed under 65 and their families.
Dementia Alliance International	dementiaallianceinternational.org	Peer-led international advocacy by people living with dementia. Connection, voice, and community.
Carer Gateway	1800 422 737 · carergateway.gov.au	Australian Government carer support service. Counselling, peer support, in-person and emergency respite.
Advance Care Planning Australia	1300 208 582 · advancecareplanning.org.au	Free advice on advance care directives – important conversations to have early in the journey.

Reviewing your plan

About two months before your plan ends you will be contacted to begin a reassessment. This is your chance to reshape supports around the year you have actually had.

Questions worth bringing

- What worked? What did not?
- Which goals did you reach, and which need more time?
- Where did you underspend or overspend, and why?
- Are your funding categories the right shape?
- Has your clinical picture changed?

Reasons to ask early

- A hospital admission or a significant clinical change.
- You need more support hours than the plan funds.
- Equipment you did not know you needed at the start of the year.
- A change in informal supports, such as losing a primary carer or moving house.

BRING EVIDENCE, NOT ARGUMENT

Shift notes that show the gap, allied health reports, hospital letters. Your support coordinator can help you build the case. InLife will provide every shift note and report you need, and we do not charge you for asking.

Your rights, and raising a concern

As an NDIS participant you have the right to

- Decide what supports you receive, and from whom.
- Be treated with dignity and respect.
- Receive supports that are safe and culturally appropriate.
- Get information in your preferred language.
- Make a complaint without losing supports.
- Choose someone to act for you: a nominee, an advocate or a guardian.
- An interpreter, at no cost.

If something is wrong

About a decision	NDIA · 1800 800 110
About a provider or worker	NDIS Commission · 1800 035 544
About InLife specifically	admin@independentlife.au, which reaches both managing directors
To appeal an NDIA decision	Internal review first, then the Administrative Review Tribunal · 1800 228 333
Independent advocate	Disability Advocacy Network · 1300 365 085
Interpreter	TIS National · 131 450

COMPLAINING IS PROTECTED

Raising a complaint is a legally protected action. No provider may reduce your support, treat you differently, or end your service because you complained. That is enforced by the NDIS Commission, and it applies to us as much as to anyone else.

The words the *NDIS* uses

ARF	Access Request Form. What you submit to apply.
ART	Administrative Review Tribunal. Reviews NDIA decisions after an internal review. It took over from the AAT in October 2024, so older paperwork may use the old name.
Core	The flexible budget covering daily personal care, community access and consumables.
Capacity Building	Funding to build skills: allied health, support coordination, employment supports.
Capital	Funding for equipment and home modifications. It cannot be moved to other categories.
FCA	Functional Capacity Assessment. A clinician's report on what you can and cannot do day to day.
LAC	Local Area Coordinator. An NDIA partner who can build your plan with you.
NDIA	National Disability Insurance Agency. Makes the funding decisions.
NDIS Commission	NDIS Quality and Safeguards Commission. Regulates providers and handles complaints.
Plan manager	A third party who processes invoices and tracks your budget for you.
SC	Support Coordinator. A funded role that helps you put your plan into practice.
SDA	Specialist Disability Accommodation. A separate funding stream for purpose-built housing. It is not a home-modification threshold.

QUESTIONS TO ASK ON THE DAY

What did you fund, and why that amount? Which budget does each support come from? What happens if my needs change mid-plan? Who do I contact if something is not working? When does this plan end?
