

Limb loss and the **NDIS**

A guide for participants, families and carers working out what the NDIS funds for limb loss, and how to ask for it.

FOR PARTICIPANTS & FAMILIES

About this guide

This guide is for people living with limb loss, and for the families and carers around them. It is written by Independent Life Disability Supports (InLife), a registered NDIS provider working with families across Victoria.

We wrote it because the NDIS is complicated, and the people who need it most usually have the least time to work it out. We have kept it plain. Where the NDIS uses jargon, we explain it. Where limb loss has its own vocabulary, we explain that too.

WHO THIS IS FOR

Three groups of readers

People recently diagnosed with limb loss, or told they may qualify for the NDIS. Families and carers supporting someone living with it. Health professionals helping a person prepare an application.

WHAT YOU WILL FIND

Six sections, and the last is yours

What limb loss is, and how it affects daily life. How the NDIS works and how to apply. The supports it commonly funds. How InLife works as a provider. Who to call. Pages to fill in and bring to your planning meeting.

A NOTE ON LANGUAGE

This guide is written in English. InLife supports families in Farsi, Urdu, Hindi, Punjabi and English, and this guide is published in eleven languages. Ask, and we will work in the language that suits your household. Interpreters are free at every NDIS meeting, and you never have to ask a family member to interpret their own health conversation.

What is in here

1	About Limb Loss	04
	What limb loss is, how it affects daily life, and where the NDIS fits in	
2	The NDIS basics	08
	The access test, applying, the planning meeting, and managing the money	
3	Your supports	15
	Allied health, equipment and the support workers who make the week work	
4	Why InLife	19
	How we roster, how we match workers to households, and what we commit to	
5	Resources & next steps	22
	Who to call, how plan reviews work, your rights, and the words the NDIS uses	
6	Your workbook	27
	Your details, a map of your week, and space for your goals	

THE WORKBOOK IS YOURS

The last four pages are a workbook: your details, a map of your week, and space for your goals. Fill them in and bring this guide to your planning meeting. A planner who can see your week does not have to imagine it.

SECTION ONE

About Limb Loss

What limb loss is, how it affects daily life, and where the NDIS fits in.

What is Limb Loss?

Major limb loss is the absence of all or part of a limb – through traumatic amputation (accident, military service, industrial injury), medical amputation (vascular disease, diabetes, cancer, severe infection), or congenital limb difference (present from birth). It is classified by level – above-knee or below-knee for lower limb, above-elbow or below-elbow for upper limb – and by laterality (unilateral or bilateral). Each combination opens different prosthetic options and different functional possibilities.

Prosthetic technology has advanced rapidly. Modern lower-limb prosthetics include microprocessor knees that adapt to terrain in real time; upper-limb prosthetics include myoelectric hands controlled by muscle signals. Many people with limb loss live without a prosthesis some or all of the time – wheelchair use, crutches, or simply moving differently are valid choices. Paralympians, parents, professionals, and athletes across every field include people with limb loss.

Common signs and symptoms

- Visible absence of part or all of a limb.
- Phantom limb sensation – feeling as if the missing limb is still present.
- Phantom limb pain – sometimes severe; manageable with specialist care.
- Residual limb (stump) pain or sensitivity, especially in the first year.
- Changes to balance, gait, posture – affecting joints over time.
- Sometimes secondary musculoskeletal pain in the remaining limbs or back.
- Skin issues at the prosthetic socket interface.

The medical context

- Traumatic and medical amputations are followed by a period of acute care, residual limb shaping (often weeks), and then prosthetic fitting.
- Initial 'preparatory' prosthesis is fitted first, followed by definitive prosthesis once the residual limb has stabilised – usually months to a year.
- Upper-limb prosthetics are body-powered (cable-operated), myoelectric (muscle-signal controlled), or cosmetic – many users have more than one.
- Lower-limb prosthetics range from basic mechanical knees to microprocessor knees (e.g. C-Leg, Genium) that adapt to walking speed and terrain.
- Sockets, liners, and componentry typically need replacement every 3–5 years; the participant's residual limb also changes shape over time.
- Diabetic amputees often need ongoing vascular monitoring of the remaining limb to prevent further loss.

LIMB LOSS IS NOT

Limb loss is not the end of athletic, professional, or family life. Many amputees never use a prosthesis and live full lives; many use prosthetics for some tasks and not others. People with congenital limb difference are not 'amputees' and may not use the word – language preferences vary, and 'limb difference' is a common alternative. Phantom limb pain is a real neurological phenomenon, not psychological, and is treatable.

Limbs 4 Life (limbs4life.org.au) is Australia's national peer support body. The Australian Orthotic Prosthetic Association (AOPA) is the prosthetics professional body. The International Society for Prosthetics and Orthotics (ISPO) Australia publishes clinical guidance.

How Limb Loss can affect daily life

Everyone's experience of Limb Loss is different. The list below covers areas the NDIS commonly funds support around – it is not a prediction. The conversation with your treating team and the NDIA Planner is what shapes your supports.

MOBILITY

How you move

Walking with prosthesis, wheelchair, crutches – often a mix depending on the situation. The right prosthetic for the right activity is the goal, not one prosthesis for everything.

WORK AND STUDY

How you earn and learn

Limb loss is compatible with every cognitive profession and most physical ones. The right workplace adjustments, JobAccess support, and prosthetic prescription are the bridge.

PAIN MANAGEMENT

How you manage discomfort

Phantom and residual limb pain are real and treatable. Pain specialists, pain psychology, mirror therapy, and the right prosthetic socket are the toolkit – pain alone should not be lived with.

DAILY LIVING

How you live each day

Cooking, dressing, showering, driving. Adaptive techniques and small tools turn most tasks into routine – and the prosthetist plus OT design the techniques together.

BODY AND SELF-IMAGE

How you feel about your body

Adjustment to limb loss is its own journey. Peer mentors with lived experience often help more than clinical psychology alone – and both are funded where useful.

FAMILY AND INTIMATE LIFE

How you connect

Intimate relationships, parenting, family life – all part of full adult life with limb loss. Where adaptive techniques for parenting help, OT and peer support are the right resource.

An ordinary life

A diagnosis of Limb Loss is not a closed door. The NDIS exists to fund what each person needs to live an ordinary life – to work or study, to spend time with family, to

“Limb loss changes one fact about a body. It does not change the person, and it does not have to change the life — when the prosthetics, the training, and the support keep pace.”

INDEPENDENT LIFE · HOW WE BEGIN EVERY PLAN

What an ordinary life can look like

- participate in their community, to enjoy the things they enjoy.
- What "ordinary life" looks like
- Working in any field – trades, design, law, medicine, sport, defence
- Studying at TAFE, university, postgraduate level
- Driving – including hand-control vehicles where needed
- Sport – Paralympic athletics, swimming, cycling, surfing, basketball
- Travelling – domestic and international
- Faith and community participation
- Intimate relationships, marriage, parenting
- Adapted outdoor recreation – climbing, skiing, hiking
- Music, art, theatre, comedy
- Advocacy, peer mentoring, lived-experience leadership

2

SECTION TWO

The NDIS basics

What the scheme is, whether you can access it, and how to prepare for a planning meeting.

What is the NDIS?

The National Disability Insurance Scheme funds the supports a person needs because of disability. It is not income support and it is not health care.

THE WORD	WHAT IT ACTUALLY MEANS
National	It runs across the whole country, wherever you live.
Disability	It funds support for intellectual, physical, sensory, cognitive, neurological and psychosocial disability, where the functional impact is substantial and likely to be lifelong.
Insurance	It takes a lifetime view, investing earlier so that less support is needed later where that is possible.
Scheme	It funds what you need to build skills, stay independent and live an ordinary life.

Who runs it

The **NDIA** (National Disability Insurance Agency) makes funding decisions. The **NDIS Quality and Safeguards Commission** regulates providers, handles complaints and protects participant rights.

The NDIS in one sentence

It funds “reasonable and necessary” supports so you can live an ordinary life. What that means in practice is the conversation you will have at your planning meeting.

Can I access the NDIS?

The four basic rules

- You are under 65 when you apply.
- You are an Australian citizen, permanent resident, or hold a Protected Special Category Visa.
- You have a permanent disability that substantially affects how you do everyday activities.
- You need support in at least one of: communication, mobility, social interaction, learning, self-care, self-management.

How to apply

- Phone the NDIA on 1800 800 110 to request an Access Request Form.
- Your GP or treating team completes the evidence sections. They are usually the ones who can describe your functional impact.
- The NDIA aims to decide within 21 days of a complete form.

FOR LIMB LOSS SPECIFICALLY

Permanent major limb loss with substantial functional impact on mobility, self-care, or self-management typically meets the NDIS access test. The strongest applications include the surgical operative report, a rehabilitation medicine letter, a recent Functional Capacity Assessment (FCA) from an OT or physiotherapist, and where prosthetic fitting is underway a letter from the prosthetist. People with congenital limb difference can apply at any age – the access test is the same.

IF YOUR APPLICATION IS DECLINED

You can ask the NDIA for an **internal review** (a section 100 review) within three months of the decision. If you are still dissatisfied, you can apply to the **Administrative Review Tribunal** on 1800 228 333 or at art.gov.au. The ART took over this work from the AAT in October 2024, so older letters and websites may still use the old name. Many decisions are changed at the internal review stage once stronger evidence is supplied, so it is worth gathering evidence before you escalate.

Before the planning meeting

The planning meeting is where your first plan gets built with the NDIA. It runs about ninety minutes. Going in prepared changes what comes out.

ONE

Write your goals

Big and small. Where do you want to be in twelve months? In five years? Goals are written in everyday language, not medical terms.

TWO

Map your day

Use the workbook at the back of this guide. Note where help would change things, and be specific about the hard parts of the day.

THREE

Gather evidence

Functional Capacity Assessment, GP letters, hospital discharge summaries, allied health reports, current medication list.

FOUR

Bring someone

Family, an advocate or a support coordinator. You can ask for a free interpreter, and you should if English is not your first language.

EXAMPLE GOALS

Goals are written in everyday language, not medical terms. The NDIA accepts goals like "I want to be able to make my own breakfast" or "I want to volunteer at the local library."

At the planning meeting

The meeting is run by an NDIA planner or a Local Area Coordinator. Both can build your plan with you.

What they will ask

- Your personal details and how you would like to be contacted.
- Which community or mainstream supports you already use: GP, hospital, family, church, mosque, gurdwara, temple.
- Your safety at home and in the community.
- Your goals, for the next twelve months and beyond.
- The kind of support that would help you reach them.

What you can do

- Take your time. Pause, think, ask for the question again.
- Use pictures, photos or other communication aids.
- Have family or a support person speak on your behalf.
- Ask for an interpreter, at no cost to you.
- Decline to answer anything that feels invasive.

BRING THIS GUIDE

The workbook pages at the back are designed for this meeting. Filled in, they give the planner a coherent picture of who you are and what you need, without you having to hold it all in your head on the day.

“Reasonable and necessary” supports

Your plan is built from supports the NDIA considers reasonable and necessary. Reasonable means fair, taking into account what is already available to you. Necessary means you need it to live an ordinary life or work toward your goals.

A support must meet all six tests

- Related to your disability, not general living costs.
- Value for money, judged against the alternatives.
- Likely to be effective and beneficial, with evidence behind it.
- Takes into account informal supports: family, carers, community.
- Most appropriately funded by the NDIS, not by health, education or housing.
- Not a day-to-day living cost everyone has, such as rent, food or ordinary internet.

WHAT THIS LOOKS LIKE FOR LIMB LOSS

For limb loss, the NDIS commonly funds prosthetic limbs (typically the most significant cost), sockets and liners (replaced regularly as the residual limb changes), wheelchair as backup mobility (essential – most amputees do not wear their prosthesis 24/7), allied health (prosthetist as lead, physiotherapy for gait training, OT for daily living, psychology for body image and adjustment), home modifications (often modest – rails, accessible bathroom), modified vehicle (hand controls or pedal modifications), and support workers for participants whose limb loss is combined with other conditions (e.g.

Three ways to manage your funds

At the planning meeting you choose how your funding is paid out. You can change this at any time during the plan, and you can use a different method for different parts of your budget.

OPTION ONE

NDIA managed

The NDIA pays your providers directly. No paperwork for you, and no invoices to check. You can only use registered providers.

OPTION TWO

Plan managed

A plan manager processes invoices and tracks your budget. You can use both registered and unregistered providers. Plan management is funded by the NDIS on top of your other budgets, at no cost to you.

OPTION THREE

Self managed

You pay providers yourself and claim back from the NDIA. The most flexibility, including on price, and the most administration.

THIS IS YOUR CHOICE, NOT YOUR PROVIDER'S

Each option suits different households, and no provider should push you toward one. Ask your planner or Local Area Coordinator to talk you through the trade-offs, and change it later if it is not working. InLife works under all three.

3

SECTION THREE

Your supports

The therapies, equipment and support workers the NDIS commonly funds for limb loss.

Allied health for Limb Loss

Allied health is the clinical layer of your supports – therapies and assessments delivered by registered professionals. For Limb Loss, the disciplines most commonly funded are: Allied health is funded under Capacity Building – Improved Daily Living.

PROSTHETICS AND ORTHOTICS

Prosthetist – your central clinician

Designs, fits, adjusts, and maintains your prosthesis. Sees you often in the first year, then for adjustments and replacements. The relationship is long-term.

OCCUPATIONAL THERAPY

OT – daily living and adaptation

Adaptive techniques for daily tasks (cooking, dressing, work), home and workplace modifications, driving assessment, equipment and assistive technology beyond the prosthesis.

EXERCISE PHYSIOLOGY

EP – strength and cardiometabolic health

Adapted strength and conditioning, cardiometabolic risk reduction. Particularly important for medical (diabetic, vascular) amputees managing the underlying disease.

PHYSIOTHERAPY

Physio – gait, strength, conditioning

Gait training with prosthesis, strength work for the residual limb, conditioning to protect the remaining joints. Essential at fitting and after socket changes.

PSYCHOLOGY

Psychologist – adjustment, body image, pain

Adjustment after traumatic or medical amputation, body image, intimate relationships, phantom pain – pain psychology has strong evidence for chronic phantom limb pain.

PAIN SPECIALIST

Pain medicine – phantom and residual limb pain

Where phantom limb pain or residual limb pain is significant, a pain specialist (medical) plus pain psychology and mirror therapy provide an evidence-based approach.

A NOTE ON FUNDING CATEGORIES

Allied health is funded under Capacity Building, Improved Daily Living, and is given to you in hours. You can use any registered allied health provider you choose. Hourly rates are capped by the NDIS price limits, so a provider cannot charge you above the cap. InLife coordinates allied health; we do not deliver it, and we are not registered for therapeutic supports.

Equipment commonly funded

The NDIS funds disability-related equipment under Capital, as assistive technology. These are the items most often funded for limb loss.

EQUIPMENT	WHAT IT IS FOR
Lower-limb prosthesis (above- knee)	Microprocessor knee, hydraulic knee, or basic mechanical depending on activity level.
Lower-limb prosthesis (below- knee)	Custom socket, suspension system, energy-storing foot, sometimes microprocessor foot.
Upper-limb prosthesis (myoelectric)	Electrical muscle signals from residual limb control a powered hand – multi-grip or single-axis. Used for functional tasks.
Upper-limb prosthesis (body-powered)	Cable-operated hook or hand – robust, lightweight, often preferred for heavy work.
Cosmetic prosthesis	Lifelike silicone limb – for social, professional, or psychological function rather than mechanical.
Sockets and liners (replacement)	Replaced every 1–3 years as residual limb changes shape. Multiple liners typically prescribed.
Backup wheelchair	Essential – most amputees use wheelchair part-time (post-shower, evenings, when prosthesis is being serviced).
Mobility aids (crutches, walking stick)	For times the prosthesis is off, or alongside in early gait training.

How a request works

- An occupational therapist or other clinician assesses the need and writes a report.
- The report, with quotes where required, goes to the NDIA.
- Low-cost items can come straight out of an existing budget. Higher-cost items need the assessment and approval first.

Home modifications

Minor home modifications cost up to \$20,000 and do not change the structure of the home. **Complex** modifications go beyond that, or affect the structure, and the NDIS funds a building construction practitioner to work alongside your home modification assessor. Neither is the same thing as Specialist Disability Accommodation, which is a separate funding stream for purpose-built housing.

Support workers, the everyday backbone

Support workers help with the daily tasks that disability makes harder: personal care, getting to appointments, cooking, medication prompting, community access, staying connected.

Most participants have a named team of three to five workers across the week. The right team feels like a small group of familiar people who know how you like things done, not a roster of strangers.

What good looks like

- The same workers week after week, not whoever is free that day.
- Workers who speak your home language at the door.
- Respect for your faith, dietary practice and household norms.
- Trained on your specific clinical needs before the first shift.

And what you should expect

- Backup workers you have met and approved in advance.
- Shift notes shared within 24 hours, in plain language.
- One escalation point when something is wrong.
- The right to change your team without having to explain why.

THE INLIFE MEET-AND-APPROVE PROMISE

No worker meets a participant for the first time on a shift. You meet them, you decide, then we roster. That holds across every plan we deliver.

4

SECTION FOUR

Why InLife

How we roster, how we match workers to households, and what we commit to.

How InLife is different

Plenty of providers fill shifts from a rotating casual pool drawn across several agencies. For someone living with limb loss, that is the wrong shape. We roster deliberately instead: a named team around each household, and no worker on a shift the household has not already met and approved.

CONSISTENCY

The same workers

A named team who know your routine, your preferences and your clinical needs. No strangers on a Tuesday because somebody called in sick.

LANGUAGE

Your language at the door

Our team works in Farsi, Urdu, Hindi, Punjabi and English. Workers are matched to the language your household actually speaks, including the language you fall back on when you are tired or unwell.

ONE POINT OF CONTACT

No call trees

One phone number and one email, both reaching the managing directors. No agency switchboard, and no “someone will get back to you”.

RECORDS

Written so you can read them

Every shift note and every report written in plain language, and a monthly summary of what has been used, copied to your support coordinator.

REGISTERED, AND VERIFIABLE

InLife is a registered NDIS provider, regulated by the NDIS Quality and Safeguards Commission, covering Core supports, Module 1 high-intensity daily personal activities and Module 2A behaviour support plan implementation. Every registration group is public on the Commission's provider register. We do not deliver therapeutic supports or Specialist Disability Accommodation, and we will tell you so rather than stretch to fit.

How we match workers to households

Matching is the part most providers skip. We treat it as the most important conversation we have with a new household.

ONE

Language

The languages spoken at home, including the one a person reaches for in moments of stress or confusion.

TWO

Gender

Cultural and personal preferences about who delivers personal care, taken as a requirement rather than a preference.

THREE

Cultural fit

Faith observance, dietary practice, household norms and family hierarchy.

FOUR

Clinical competency

The specific skills the person's support requires: medication, transfers, mealtime management, seizure response.

FIVE

Geography

Close enough that workers arrive on time and stay reliable over a long placement.

SIX

You decide

We shortlist, you meet them, you approve. Only then do we roster. If it is not working, say so and we change it.

5

SECTION FIVE

Resources & next steps

Where to turn, how plan reviews work, your rights, and the words the NDIS uses.

Where to turn

About the NDIS

ORGANISATION	HOW TO REACH THEM	WHAT THEY DO
NDIA	1800 800 110 · ndis.gov.au	Access decisions, plan reviews, general NDIS enquiries.
NDIS Commission	1800 035 544 · ndiscommission.gov.au	Complaints about providers and workers, conduct, restrictive practices.
Administrative Review Tribunal	1800 228 333 · art.gov.au	External review of NDIA decisions after an internal review. Took over from the AAT in October 2024.
Disability Advocacy Network	1300 365 085 · da.org.au	Independent advocacy when you feel unheard.
TIS National	131 450	Free interpreting, in more than 150 languages.

For Limb Loss specifically

ORGANISATION	HOW TO REACH THEM	WHAT THEY DO
Limbs 4 Life	1300 782 231 · limbs4life.org.au	National peak peer-support organisation. Peer mentors, family support, magazine, advocacy, information across Australia.
Amputees & Families Support Group (AFSG)	afsg.org.au	Family-focused peer support – particularly for new amputees and their families. State-based chapters.
Wheelchair Sports Australia	wsportaus.org.au	Wheelchair basketball, rugby, tennis, athletics – strong pathway for many amputees, particularly bilateral lower-limb.
Disabled Wintersport Australia	disabledwintersport.com.au	Adapted skiing and snow sports – sit-ski and stand-ski options for amputees.
Paralympics Australia	02 9704 0500 · paralympic.org.au	Pathway into Paralympic sport – para-athletics, para-swimming, para-cycling, sitting volleyball, para-triathlon.
Australian Orthotic Prosthetic Association	aopa.org.au	Find an accredited prosthetist. Practitioner directory and professional standards.

Reviewing your plan

About two months before your plan ends you will be contacted to begin a reassessment. This is your chance to reshape supports around the year you have actually had.

Questions worth bringing

- What worked? What did not?
- Which goals did you reach, and which need more time?
- Where did you underspend or overspend, and why?
- Are your funding categories the right shape?
- Has your clinical picture changed?

Reasons to ask early

- A hospital admission or a significant clinical change.
- You need more support hours than the plan funds.
- Equipment you did not know you needed at the start of the year.
- A change in informal supports, such as losing a primary carer or moving house.

BRING EVIDENCE, NOT ARGUMENT

Shift notes that show the gap, allied health reports, hospital letters. Your support coordinator can help you build the case. InLife will provide every shift note and report you need, and we do not charge you for asking.

Your rights, and raising a concern

As an NDIS participant you have the right to

- Decide what supports you receive, and from whom.
- Be treated with dignity and respect.
- Receive supports that are safe and culturally appropriate.
- Get information in your preferred language.
- Make a complaint without losing supports.
- Choose someone to act for you: a nominee, an advocate or a guardian.
- An interpreter, at no cost.

If something is wrong

About a decision	NDIA · 1800 800 110
About a provider or worker	NDIS Commission · 1800 035 544
About InLife specifically	admin@independentlife.au, which reaches both managing directors
To appeal an NDIA decision	Internal review first, then the Administrative Review Tribunal · 1800 228 333
Independent advocate	Disability Advocacy Network · 1300 365 085
Interpreter	TIS National · 131 450

COMPLAINING IS PROTECTED

Raising a complaint is a legally protected action. No provider may reduce your support, treat you differently, or end your service because you complained. That is enforced by the NDIS Commission, and it applies to us as much as to anyone else.

The words the *NDIS* uses

ARF	Access Request Form. What you submit to apply.
ART	Administrative Review Tribunal. Reviews NDIA decisions after an internal review. It took over from the AAT in October 2024, so older paperwork may use the old name.
Core	The flexible budget covering daily personal care, community access and consumables.
Capacity Building	Funding to build skills: allied health, support coordination, employment supports.
Capital	Funding for equipment and home modifications. It cannot be moved to other categories.
FCA	Functional Capacity Assessment. A clinician's report on what you can and cannot do day to day.
LAC	Local Area Coordinator. An NDIA partner who can build your plan with you.
NDIA	National Disability Insurance Agency. Makes the funding decisions.
NDIS Commission	NDIS Quality and Safeguards Commission. Regulates providers and handles complaints.
Plan manager	A third party who processes invoices and tracks your budget for you.
SC	Support Coordinator. A funded role that helps you put your plan into practice.
SDA	Specialist Disability Accommodation. A separate funding stream for purpose-built housing. It is not a home-modification threshold.
